

Mark Scaling by Linear or Percentage Adjustment

Summary

Marks can be scaled up or down at item, component or assessment level.

This document covers these scaling methods:

Linear Adjustment

Increase or decrease marks by a specified number.

E.g. Add 5 marks to all results, so a mark of 50 becomes 55, 30 becomes 35 etc.

Percentage Adjustment

Increase or decrease marks by a specified percentage.

E.g. Add 10% to all results, so a mark of 50 becomes 55, 30 becomes 33 etc.

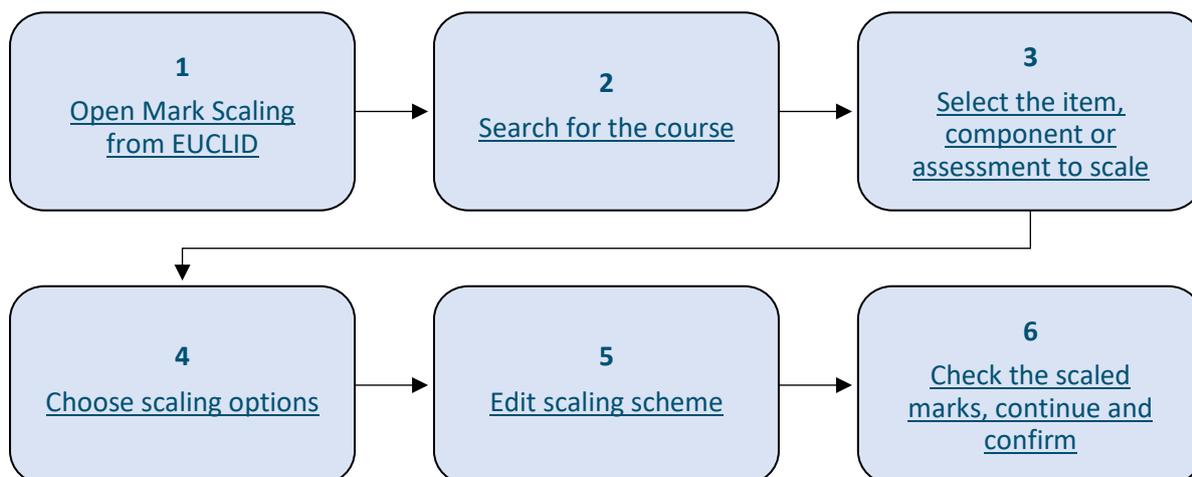

Requirements

- Access to the mark scaling screens in EUCLID.

- Scaling enabled for the course instance you want to scale.
Contact [Student Systems](#) to request access to scaling, you will also need to specify which courses you want to scale.
- Assessment marks have been entered, mark adjustments applied and the course marks have been calculated.

Process Overview

Step by Step Instructions

1. Open Mark Scaling from EUCLID

If this doesn't show please email [Student Systems](#) to arrange access.

2. Search for the course

Enter the Academic Year and Module (Course) code or name and then click Search.

If there are multiple instances of the course running you should also specify the Period Slot and Occurrence code.

Mark Scaling

This screen allows you to select the module that you wish to apply scaling to and will then guide you through the scaling process up to the point that any changes are committed

Module Search Criteria

Academic Year	<input type="text" value="2020/1"/>	2020/21 ACADEMIC YEAR
Period Slot	<input type="text" value="YR"/>	Full Year
Module	<input type="text" value="ELCH08007"/>	Culture and Society in the Portuguese Speaking World
Occurrence	<input type="text" value="SV1"/>	
Scheme	<input type="text"/>	
Level	<input type="text"/>	
Department	<input type="text"/>	
Module Tutor	<input type="text"/>	

3. Select the item, component or assessment to scale

Once in the tool you need to click the right 'Scale' button depending on what you're scaling:

Assessment scaling

If scaling an assessment you need to click the "Scale" button on the right of the assessment you want to scale.

Module Details

Year	2020/1	
Period	YR	
Module	ELCH08007	
Title	Culture and Society in the Portuguese Speaking World	
Occurrence	SV1	

Assessment Details

Item	Assessment Name	Questions	Scale
003	Coursework	<input type="button" value="Details"/>	<input type="button" value="Scale"/>

Component scaling

If scaling a component, you need to first click the “Details” button for the assessment:

Module Details

Year 2020/1

Period YR

Module ELCH08007

Title Culture and Society in the Portuguese Speaking World

Occurrence SV1

Assessment Details

Item	Assessment Name	Questions	Scale
003	Coursework	Details	Scale

[Go Back](#)

Then click the “Scale” button underneath the component you want to scale:

Assessment Question Details

Assessment
Reassessment

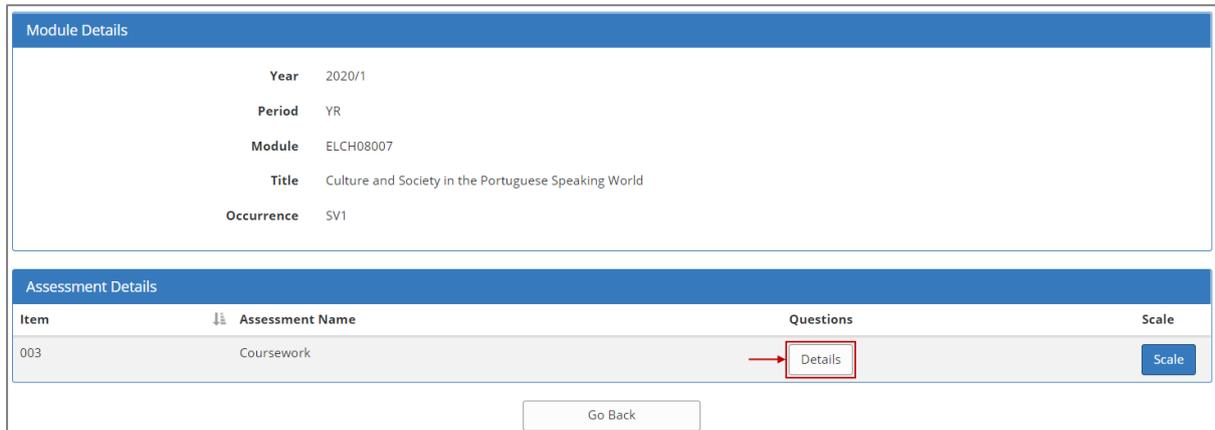

Coursework (Seq. 1)

Question Seq.	Name	Scale
1	Presentation	Scale
2	Commentary	Scale
3	Podcast	Scale
4	Essay	Scale
Scale		

[Close](#)

Item scaling

If scaling an item, you need to first click the “Details” button for the assessment:

Module Details

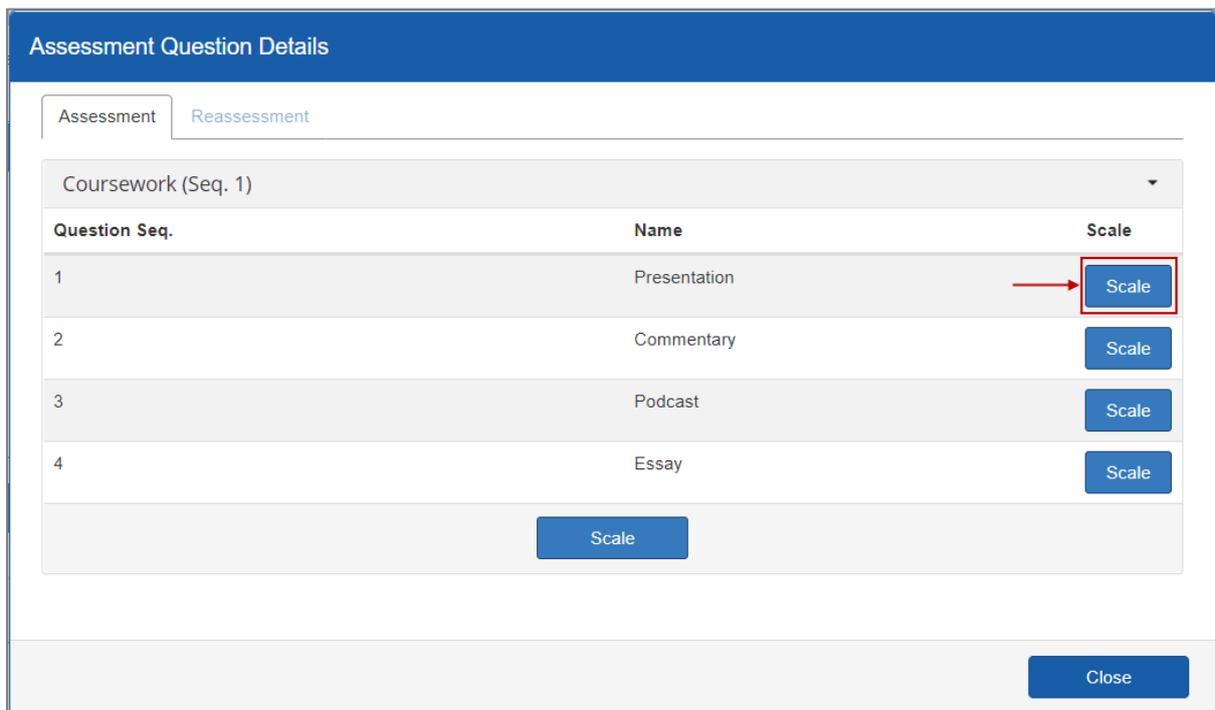

Year 2020/1
 Period YR
 Module ELCH08007
 Title Culture and Society in the Portuguese Speaking World
 Occurrence SV1

Assessment Details

Item	Assessment Name	Questions	Scale
003	Coursework	Details	Scale

Go Back

Then click the “Scale” button on the right of the item you want to scale:

Assessment Question Details

Assessment Reassessment

Coursework (Seq. 1)

Question Seq.	Name	Scale
1	Presentation	Scale
2	Commentary	Scale
3	Podcast	Scale
4	Essay	Scale

[Scale](#)

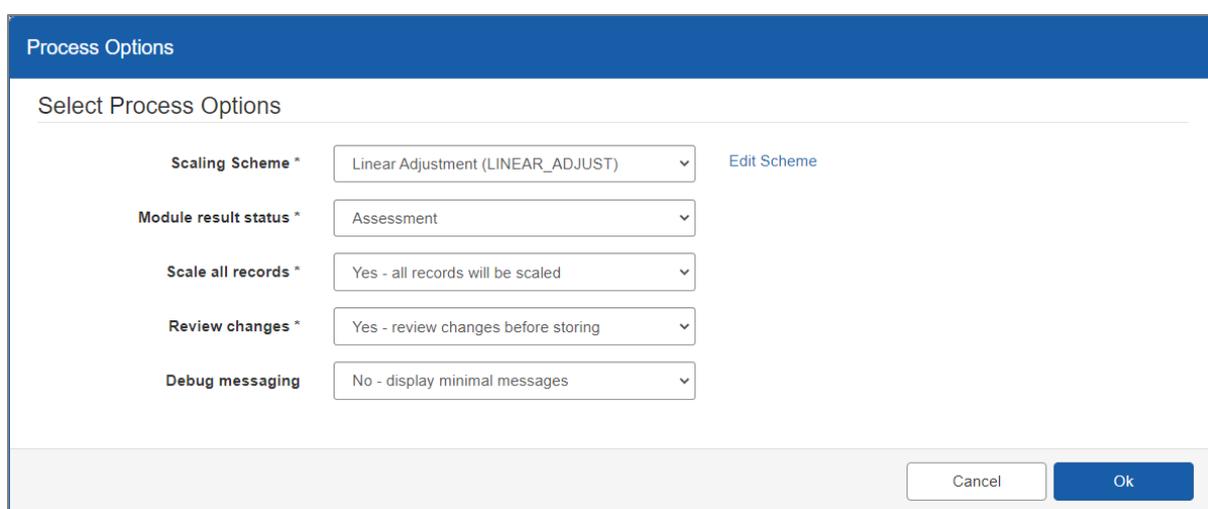

[Close](#)

A pop up window “Select Process Options” will now appear.

4. Choose scaling options

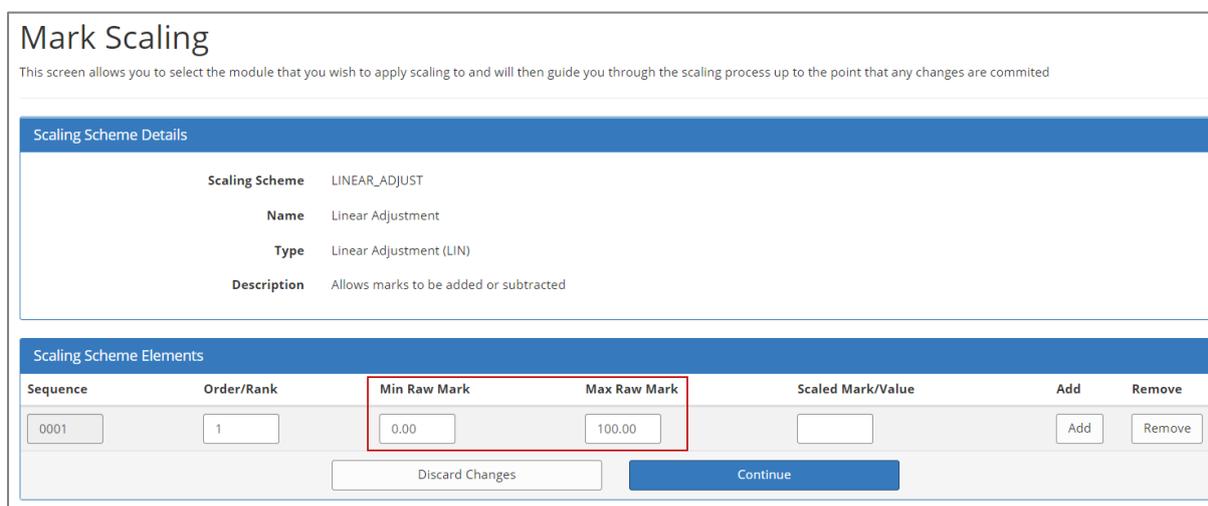

Select from the drop down menus for each option but **don't click OK yet** (you'll do this after Step 5):

- **Scaling scheme:** choose your scaling method from the list:
 - **Linear Adjustment** – Increase or decrease marks by a number
 - **Percentage Adjustment** – Increase or decrease marks by a percentage
- **Module result status** [this only shows if scaling an assessment]: choose to scale assessment (first sit) results, reassessment (resit), or both
- **Scale all records:** choose to scale all students or to select which students you want to scale.
- **Review changes:** leave this as Yes so you can review changes before committing them
- **Debug messaging:** choose if you want detailed error messages or just minimal messages

5. Edit scaling scheme

- Click Edit Scheme
- This will bring you to the “Scaling Scheme Elements” screen that allows you to set the range of marks you want to scale.
- By default it is set to scale marks from 0 to 100 for Linear and Percentage adjustments.

Mark Scaling

This screen allows you to select the module that you wish to apply scaling to and will then guide you through the scaling process up to the point that any changes are committed

Sequence	Order/Rank	Min Raw Mark	Max Raw Mark	Scaled Mark/Value	Add	Remove
0001	1	0.00	100.00		Add	Remove

- You can change the values in “Min Raw Mark” and “Max Raw Mark” to set the range of marks to be scaled.
- In this example only marks from 20 to 80 will be scaled:

Scaling Scheme Elements						
Sequence	Order/Rank	Min Raw Mark	Max Raw Mark	Scaled Mark/Value	Add	Remove
0001	1	20.00	80.00		Add	Remove
Discard Changes			Continue			

- If you are scaling an item that is marked out of more than 100 then you’ll need to adjust the “Max Raw Mark”.

Scaling Scheme Elements						
Sequence	Order/Rank	Min Raw Mark	Max Raw Mark	Scaled Mark/Value	Add	Remove
0001	1	0.00	150.00	✘	Add	Remove
Discard Changes			Continue			

- Under “Scaled Mark/Value” enter the value you want to scale with:

Scaling Scheme Elements						
Sequence	Order/Rank	Min Raw Mark	Max Raw Mark	Scaled Mark/Value	Add	Remove
0001	1	0.00	100.00	10.00	Add	Remove
Discard Changes			Continue			

- Click Continue. This will return you to the “Select Process Options” window.
- Check your options and click “OK”:

Process Options	
Select Process Options	
Scaling Scheme *	Linear Adjustment (LINEAR_ADJUST) Edit Scheme
Module result status *	Assessment
Scale all records *	Yes - all records will be scaled
Review changes *	Yes - review changes before storing
Debug messaging	No - display minimal messages
Cancel Ok	

- This will run the scaling process and you'll then see a screen to check the scaling results.

Mark Scaling

This screen allows you to select the module that you wish to apply scaling to and will then guide you through the scaling process up to the point that any changes are committed

Scaling Results					
Student	Name	Original Mark	Original Grade	Scaled Mark	Scaled Grade
		80	A2	90	A1
		60	B	70	A3
		20	F	30	E
		10	G	20	F
		40	D	50	C
		90	A1	100	A1
		50	C	60	B
		30	E	40	D
		70	A3	80	A2

6. Check the scaled marks, continue and confirm

- Scan the list and check the marks have been adjusted correctly and when ready, click “Continue” at the bottom of the page.

30	E	40	D
70	A3	80	A2

- Click “Yes” to commit the changes.

Commit Changes?

Do you wish to commit the scaled results? Select Yes to store changes or No to discard them

- Click “OK” to close the confirmation box:

Commit Complete

The commit process has completed.

Next steps

You need to calculate the course results in the Assessment Hub to see the changes to the course mark.

For guidance, see [Calculate](#).

Troubleshooting

Assessment Marks

The scaling process will fail if you enter values in the scaling scheme that will scale assessment marks over the maximum mark (100 for assessments).

Example

A Linear Adjustment of 12 is applied:

Scaling Scheme Elements						
Sequence	Order/Rank	Min Raw Mark	Max Raw Mark	Scaled Mark/Value	Add	Remove
0001	1	0.00	100.00	12.00	Add	Remove
		Discard Changes		Continue		

The highest mark achieved for the assessment being scaled is 90:

Select	Student	Name	Original Mark	Original Grade	Assessment Status	Scaling Status
<input checked="" type="checkbox"/>			80.00	A2	SAS	Not Scaled
<input checked="" type="checkbox"/>			60.00	B	SAS	Not Scaled
<input checked="" type="checkbox"/>			20.00	F	SAS	Not Scaled
<input checked="" type="checkbox"/>			10.00	G	SAS	Not Scaled
<input checked="" type="checkbox"/>			40.00	D	SAS	Not Scaled
<input checked="" type="checkbox"/>			90.00	A1	SAS	Not Scaled
<input checked="" type="checkbox"/>			50.00	C	SAS	Not Scaled
<input checked="" type="checkbox"/>			30.00	E	SAS	Not Scaled
<input checked="" type="checkbox"/>			70.00	A3	SAS	Not Scaled

When the scaling process runs it fails to complete.

Clicking “View Messages” will show which records caused the problem:

Processing Not Completed

The processing could not be completed. Use the View Messages button to see any process messaging or click the Ok button to continue.

View Messages
Ok

Scaling Messages

Running Mark Scaling process for 2020/1 YR ELCH08007 SV1
 No SRA records could be found in a status valid for scaling
 SAS for student and assessment 003 could not be scaled as no grade could be found for scaled mark 102

Scaling process results:
 8 record(s) could be scaled
 0 record(s) were skipped
 1 record(s) errored

There are 2 ways to resolve this.

1. Choose which students to include

In the process options set “Scale all records” to “No - select the records to scale”:

Process Options

Select Process Options

Scaling Scheme * Linear Adjustment (LINEAR_ADJUST)

Module result status * Assessment

Scale all records * No - select the records to scale ←

Review changes * Yes - review changes before storing

Debug messaging Yes - display additional messages

Deselect the students that will cause the process to fail using the check boxes on the left of the screen. Scaling will ignore these students.

<input checked="" type="checkbox"/>	10.00	G	SAS	Not Scaled
<input checked="" type="checkbox"/>	40.00	D	SAS	Not Scaled
<input type="checkbox"/> ←	90.00	A1	SAS	Not Scaled
<input checked="" type="checkbox"/>	50.00	C	SAS	Not Scaled

Adjust the marks for these students in the assessment hub manually if required.

2. Adjust the Scaling Scheme

Set the “Max Raw Mark” to a value to prevent a scaled mark of more than 100.

In this example the “Scaled Make/Value” is set to 12 for a Linear Adjustment, so the maximum assessment mark that can be scaled is 88.

When the scaling process runs any marks over 88 will be ignored:

Scaling Scheme Elements						
Sequence	Order/Rank	Min Raw Mark	Max Raw Mark	Scaled Mark/Value	Add	Remove
0001	1	0.00	88.00	12.00	Add	Remove
Discard Changes			Continue			

Marks over 88 can be adjusted manually in the assessment hub.

Component and Item Marks

Component marks can be scaled over 100 and item marks can be scaled over their “marked out of” value.

The scaling process doesn’t fail but this can prevent the assessment and course results being calculated if the component or item mark result in an assessment mark of more than 100.

In this example the item “Part 1” which is marked out of 10 has been scaled to 14.

Coursework (Weight: 50%)	90 %	
Test (Weight: 100%)	90 %	
Part 1 (Weight: 50%)	5	14 / 10 Remove scaling
Part 2 (Weight: 50%)	9 / 10	

This stops the assessment and course results being calculated as the assessment result will be more than 100 (115% in this case).

To prevent this, either deselect students so they don’t get processed or adjust the scaling scheme to exclude higher marks.

Reset Scaling

You can return marks to the original value by setting the “Scaled Mark/Value” to 0 and running the scaling process again.

Sequence	Order/Rank	Min Raw Mark	Max Raw Mark	Scaled Mark/Value	Add	Remove
0001	1	0.00	100.00	0.00	Add	Remove

Discard Changes Continue

Scaling can be removed in the “i” screen and the Process Course results Screen, details can be found [here](#).

Note: Scaling needs to be removed if you need to change component marks for a scaled assessment.

The assessment mark won't calculate to reflect component changes until scaling has been removed.
